JAPANESE JOURNAL OF OPHTHALMOGY

VOLUME 17, 1973

Contents

The strabismus symposium in Kyoto..... 1
Distribution of twitch and slow fibers in extraocular muscles.....*Kensei Cheng-Minoda & Yoshihiko Sato*... 2
Maximum velocity of saccadic eye movements in normal and strabismic subjects.....*Satoshi Ishikawa & Ritsuko Terakado*... 11
Simultaneous recording of the bilateral eye movements over a small angle.....*Makoto Inatomi*... 22
Asymmetric version in pursuit eye movement under extrafoveal fixation.....*Sakuko Fukai & Jun Tsutsui*... 30
Quantitative forced duction test.....*Hirotaka Shirotsuki, Akira Koga, & Fumiharu Iwase*... 40
Surgical correction of infantile esotropia.....*Yasuo Uemura*... 50
Vision screening of three year old children.....*Masaru Kozaki, Hisako Iwai & Chizuru Mikami*... 60
Amblyopia in man, suggestive of stimulus deprivation amblyopia.....*Shinobu Awaya, Yozo Miyake, Yukiko Imaizumi, Yoshihiko Shiose, Takako Kanda & Kuniko Komuro*... 69
Abnormality of the visual evoked response in various types of amblyopia.....*Jun Tsutsui, Yasuko Nakamura, Junko Takenaka & Sakuko Fukai*... 83
Dark adaptation in amblyopic eyes.....*Norio Ohba & Hiroko Yamamoto*... 94
Horizontal and vertical smooth pursuit eye movement.....*Atsumi Yamazaki & Satoshi Ishikawa*...103
Spectral responses in the human electroretinogram and their clinical significance.....*Minoru Yokoyama, Teruya Yoshida & Kenji Ui*...113
Micro-autoradiographic studies on incorporation of 5-iodo-2′-deoxyuridine into herpes simplex virus.....*Kayoko Matsumura, Michimasa Fujimoto & Yukihiko Mitsui*...125
Pore structures of the endothelial cells of the aqueous outflow pathway: scanning electron microscopy.....*Katsuzo Segawa*...133
Effect of guanethidine on the vesiculated axon in

the dilator muscle area of the iris:
an electron microscopical study.....*Tadashi Tamura*...140
The surface view of photoreceptor cells in the outer
nuclear layer clarified by the
freeze-etch technique.....*Toshihiko Matsusaka*...147
Sylvian aqueduct syndrome and mesencephalic
skew deviation.....*Seikoh Wakusawa*...154
Prostaglandins and uveitis: a preliminary
report.....*Kanjiro Masuda, Yasuho Izawa & Saiichi Mishima*...166
Endoscopic observation of the lacrimal sac
following dacryocystorhinostomy.....*Yukio Tajima & Munehiro Ikegami*...175
Physiological studies on the mechanism of
lacrimal secretion.....*Tachio Kikkawa & Yusuke Imai*...183
Glycogen content of the cornea following
tightly fitted contact lens wear.....*Toshifumi Otori & Kenichi Kishida*...194
Histochemical interpretation of
fluorescein angiogram.....*Katsuyoshi Mizuno, Kiyoshi Otsuki & Kazuyuki Sasaki*...202
Studies on the retinal microcirculation of
the rabbit in vivo.....*Shinobu Akiya & Tadahiro Kohzuka*...210
The electroretinogram of the enucleated rat eyeball.....*Seiichi Suga*...220
An autoradiographic study of intracellular incorporation
of uridine dinucleotide in retinal and visuo-sensory
neurons after exposure to organic mercury.....*Noritsugu Mukai*...228
Fine structure of the Edinger Westphal nucleus
of the cat.....*Teruo Tanishima*...236
A new instrument for recording of the
eye movement.....*Satoshi Ishikawa & Atsumi Yamazaki*...244
The immune response to corneal allografts.....*A. Edward Maumenee*...255
Perimetry in young children.....*Fujiko Liao*...277
Viscosity of rabbit tear.....*Hikaru Hamano & Sachiko Mitsunaga*...290
Effects of prostaglandins on inflow and outflow
of the aqueous humor in rabbit.....*Kanjiro Masuda & Saiichi Mishima*...300
Graphical expression of the intraocular
pressure dynamics.....*Ikuo Azuma*...310
Histochemical identification of fluorescein
sodium in normal retina.....*Kazuyuki Sasaki, Kiyoshi Otsuki & Katsuyoshi Mizuno*...323

Electroretinographic study of the rat after fenthion intoxication.....*Mikio Miyata, Hiroko Imai & Satoshi Ishikawa*...335
Use of mirror in micro-surgery.....*Shinichiro Sugita*...344

Subject Index of Volume 17

Amblyopia	Asymmetric version in pursuit eye movement under extrafoveal fixation (*Fukai et al.*)	30
	Amblyopia in man, suggestive of stimulus deprivation amblyopia (*Awaya et al.*)	69
	Abnormality of the visual evoked response in various types of amblyopia (*Tsutsui et al.*)	83
	Dark adaptation in amblyopic eyes (*Ohba et al.*)	94
Aqueous humor	Pore structures of the endothelial cells of the aqueous outflow pathway: scanning electron microscopy (*Segawa*)	133
	Effects of prostaglandins on inflow and outflow of the aqueous humor in rabbit (*Masuda et al.*)	300
	Graphical expression of the intraocular pressure dynamics (*Azuma*)	310
Cornea	Micro-autoradiographic studies on incorporation of 5-iodo-2′-deoxyuridine into herpes simplex virus (*Matsumura et al.*)	125
	Glycogen content of the cornea following tightly fitted contact lens wear (*Otori et al.*)	194
	The immune response to corneal allografts (*Maumenee*)	255
Electronmicroscopy	Distribution of twitch and slow fibers in extraocular muscles (*Cheng-Minoda et al.*)	2
	Micro-autoradiographic studies on incorporation of 5-iodo-2′-deoxyuridine into herpes simplex virus (*Matsumura et al.*)	125
	Pore structures of the endothelial cells of the aqueous outflow pathway: scanning electron microscopy (*Segawa*)	133
	The surface view of photoreceptor cells in the outer nuclear layer clarified by the freeze-etch technique (*Matsusaka*)	140
	Fine structure of the Edinger Westphal nucleus of the cat (*Tanishima*)	236
Electroretinogram	Amblyopia in man, suggestive of stimulus deprivation amblyopis (*Awaya et al.*)	69
	Spectral responses in the human electroretinogram and their clinical significance (*Yokoyama et al.*)	113
	The electroretinogram of the enucleated rat eyeball (*Suga*)	220
	Electroretinographic study of the rat after fenthion intoxica-	

	tion (*Miyata et al.*)	335
Extraocular muscle	Distribution of twitch and slo fibers in extraocular muscles (*Cheng-Minoda*)	2
	Maximum velocity of saccadic eye movements in normal and strabismic subjects (*Ishikawa et al.*)	11
	Simultaneous recording of the bilateral eye movements over a small angle (*Inatomi*)	22
	Quantitative forced duction test (*Shirotsuki et al.*)	40
	Horizontal and vertical smooth pursuit eye movement (*Yamazaki et al.*)	103
Eye movement	Maximum velocity of saccadic eye movements in normal and strabismic subjects (*Ishikawa et al.*)	11
	Simultaneous recording of the bialteral eye movements over a small angle (*Inatome*)	22
	Asymmetric version in pursuit eye movement under extrafoveal fixation (*Fukai et al.*)	30
	Quantitative forced duction test (*Shirotsuki et al.*)	40
	Horizontal and vertical smooth pursuit eye movement (*Yamazaki et al.*)	103
	Sylvian aqueduct syndrome and mesencephalic skew deviation (*Wakusawa*)	154
	A new instrument for recording of the eye movement (*Ishikawa et al.*)	244
Intoxication	An autoradiographic study of intracellular incorporation of uridine dinucleotide in retinal and visuo-sensory neurons after exposure to organic mercury (*Mukai*)	228
	Electroretinographic study of the rat after fenthion intoxication (*Miyata et al.*)	335
Intraocular pressure	Pore structures of the endothelial cells of the aqueous outflow pathway: scanning electron microscopy (*Segawa*)	133
	Effects of prostaglandins on inflow and outflow of the aqueous humor in rabbit (*Masuda et al.*)	300
	Graphical expression of the intraocular pressue dynamics (*Azuma*)	310
Iris	Effect of guanethidine on the vesiculated axon in the dilator muscle area of the iris: an electronmicroscopical study	

	(*Tamura*)	140
Lacrimal apparatus	Endoscopic observation of the lacrimal sac following dacryocystorhinostomy (*Tajima et al.*)	175
	Physiological studies on the mechanism of lacrimal secretion (*Kikkawa et al.*)	183
	Viscosity of rabbit tears (*Hamano et al.*)	290
Microsurgery	Use of mirror in micro-surgery (*Sugita*)	344
Pharmacology	Effect of guanethidine on the vesiculated axon in the dilator muscle area of the iris: an electron microscopical study (*Tamura*)	140
	Prostaglandins and uveitis: a preliminary report (*Masuda et al.*)	166
	An autoradiographic study of intracullular incorporation of uridine dinucleotide in retinal and visuosensory neurons after exposure to organic mercury (*Mukai*)	228
	Effects of prostaglandina on inflow and out flow of the aqueous humor in rabbit (*Masuda et al.*)	300
Prostaglandins	Prostaglandins and uveitis: a preliminary report (*Masuda et al.*)	166
	Effects of prostaglandins on inflow and outflow of the aqueous humor in rabbit (*Masuda et al.*)	300
Retina	The surface view of photoreceptor cells in the outer nuclear layer clarified by the freeze-etch technique (*Matsusaka*)	147
	Histochemical interpretaiion of fluorescein angiogram (*Mizuno et al.*)	202
	Studies on the retinal microcirculation of the rabbit in vivo (*Akiya et al.*)	210
	An autoradiographic study of intracellular incorporation of uridine dinucleotide in retinal and visuo-sensory neurons after exposure to organic mercury (*Mukai*)	228
	Histochemical identification of fluorescein sodium in normal retina (*Sasaki et al.*)	323
	Electroretinographic study of the rat after fenthion intoxication (*Miyata et al.*)	335
Skew deviation	Sylvian aqueduct syndrome and mesencephalic skew deviation (*Wakusawa*)	154

Strabismus	Maximum velocity of saccadic eye movements in normal and strabismic subjects (*Ishikawa et al.*)	11
	Asymmetric version in pursuit eye movement under extrafoveal fixation (*Fukai et al.*)	30
	Surgical correction of infantile esotropia (*Uemura*)	50
	Amblyopia in man, suggestive of stimulus deprivation amblyopia (*Awaya et al.*)	69
Sylvian aqueduct syndrome	Sylvian aqueduct syndrome and mesencephalic skew deviation (*Wakusawa*)	154
Vision	Vision screening of three year old children (*Kozaki et al.*)	60
	Perimetry in young children (*Liao*)	
Visual evoked response	Amblyopia in man, suggestive of stimulus deprivation amblypia (*Awaya et al.*)	69
	Abnormality of the visual evoked response in various types of amblyopia (*Tsutsui et al.*)	83
Visual field	Perimetry in young children (*Liao*)	277

Index of Authors to Volume 17

A AKIYA Shinobu: Studies on the retinal microcirculation of the rabbit in vivo 210

AWAYA Shinobu: Amblyopia in man, suggestive of stimulus deprivation amblyopia 69

AZUMA Ikuo: Graphical expression of the intraocular pressure dynamics 310

F FUKAI Jun: (1) Asymmetric version in pursuit eye movement under extra-foveal fixation 30

(2) Abnormality of the visual evoked response in various types of amblyopia 83

FUJIMOTO Michimasa: Micro-autoradiographic studies on incorporation of 5-iodo-2'-deoxyuridine into herpes simplex virus 125

H HAMANO Hikaru: Viscosity of rabbit tears 290

I IKEGAMI Munehiro: Endoscopic observation of the lacrimal sac following dacryocystorhinostomy 175

IMAI Hiroko: Electroretinographic study of the rat after fenthion intoxication 335

IMAI Yusuke: Physiological studies on the mechanism of lacrimal secretion 183

IMAIZUMI Yukiko: see AWAYA 69

INATOMI Makoto: Simultaneous recording of the bilateral eye movements over a small angle 22

ISHIKAWA Satoshi: (1) Maximum velocity of saccadic eye movements in normal and strabismic subjects 11

(2) Horizontal and vertical smooth pursuit eye movement 103

(3) A new instrument for recording of the eye movement 244

(4) see IMAI Hiroko 335

IWAI Hisako: Vision screening of three year old children 60

IWASE Fumiharu: Quantitative forced duction test 40

IZAWA Yasuho: Prostaglandins and uveitis: a preliminary report 166

K KANDA Takako: see AWAYA 69

KIKKAWA Tachio: see IMAI Yosuke 183

KISHIDA Kenichi: Glycogen content of the cornea following tightly fitted contact lens wear 194
